REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claim 10 and the claims depending therefrom are allowed over the embodiment of figure 6 of Salmi et al because Salmi et al does not disclose "wherein said box like assembly unit is arranged to be fixedly attached to the hull of a ship" as argued by applicant on page 6 of the response filed October 19, 2004, last full paragraph and because Salmi et al does not disclose a cooling system comprising at least a fan mounted within the box like assembly unit, within a space between the base and the outer walls of the box like assembly unit. Fans 32 of Salmi et al are not within a space between the base and the outer walls of the box like assembly unit.

Claim 10 and the claims depending therefrom are allowed over figure 1 of the instant application because the specification of the instant application defines the seating module 6 with four side walls 6B-6C, an upper portion plate 6F and an outer plate 6A. In figure 1 of the instant application the cooling unit 8 and the fan 7 is not included in the module unit 6. Claim 10 defines a cooling system comprising at least a fan mounted within the box like assembly unit within a space between the base and the outer walls of the box like assembly unit. As pointed out by applicant in the response filed October 19, 2004, page 7, first full paragraph, figure 1 of the instant application does not show the cooling unit 8 and the fan 7 as being included in the box like assembly unit arranged to be fixedly attached to the hull of a ship to form a seating.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
